Education

2018 - 2020
Medieinstitutet – Web developer
Set up LAMP stack environment in order to host a PHP applications, including database management with MySQL.

Create fullstack applications using WordPress or Laravel, including frontends frameworks such as Vue & jQuery, or plain JavaScript.

Including a total of 7 months internship as a frontend developer.

2020 - 2022
Medieinstitutet – Frontend developer
Advanced frontend SPA development, including communication with a NodeJS Express backend, and storing data using MongoDB or SQL.

The frontend (JavaScript) taught primarily React, with Vue as a substitute. I picked up TypeScript right away, on my own.

Including a total of 7 months internship as a frontend developer.

Work

2022 - Present
Nationalencyklopedin – Frontend developer
Develop modern interfaces using primarily NextJS (and React), including collaborating with UX designers. I've taken initiative to improve designs and UX. TypeScripted is used over JavaScript where applicable.

Work with tenants from different countries, often in a single application.

Create frontend applications from the ground up, and maintain them. I've also done maintenance and added functionality to older applications.

Collaborate with colleagues in order to improve the architecture and quality of the codebase.

Work in a professional agile environment, primarily using Jira.

References available upon request.
